

NOTES

1. All Dimensions are shown in inches
2. Material: 10, 12, 14, 16, 18 Ga. Galvanized steel yield strength will vary - please call for confirmation.
3. All inside bend radii are 0.188"
4. Standard angle of returns are as follows:
Zee 135°
Cee 90°
Eave Channel 90°
5. All returns sizes shown on standard sizes are "nominal", actual dimension varies and is determined by material gauge and width
6. Eave channel "height" varies to suit roof slope.
7. Standard eave channels have identical top & bottom flange size and shapes.
8. Maximum slope for 14" eave channel is 1:12
